

**PM Conformity Hot Spot Analysis
Project Summary Form for Interagency Consultation**

**I-215/McCall Boulevard Interchange Improvements Project
City of Menifee, Riverside County, California
District 08-RIV-215-PM R20.1/21.5
Federal Aid Project No. EA-1F700/PN 0815000023
RTIP ID# RIV151218**

In December 2021, the I-215/McCall Boulevard Interchange Improvements Project underwent Interagency Consultation through the SCAG Transportation Conformity Working Group to determine if it is a Project of Air Quality Concern (POAQC). The SCAG Transportation Conformity Working Group determined the project is not a POAQC on December 7, 2021.

Since that time, it was determined the Post Miles needed to be updated in SCAG's FTIP from Post Miles R20.3/21.3 to R20.1/21.5 due to the need for traffic control during construction. This was a minor update to the FTIP and the project description and features remain the same as previously concurred upon, with the only change being the post mile limits. No new modeling was conducted for this change.

Due to the revision in Post Miles, the I-215/McCall Boulevard Interchange Improvements Project is required to go through Interagency Consultation again. There are no other changes to the *PM Conformity Hot Spot Analysis – Project Summary for Interagency Consultation form* with exception to the Post Miles reference in the Project Description and attached figures. Please use the revised form to provide concurrence that this project continues to not be a POAQC.
