PROJECT LIST  
ADOPTED ON SEPTEMBER 3, 2020

# TRANSPORTATION SYSTEM

## Project List

### FRAMEWORK

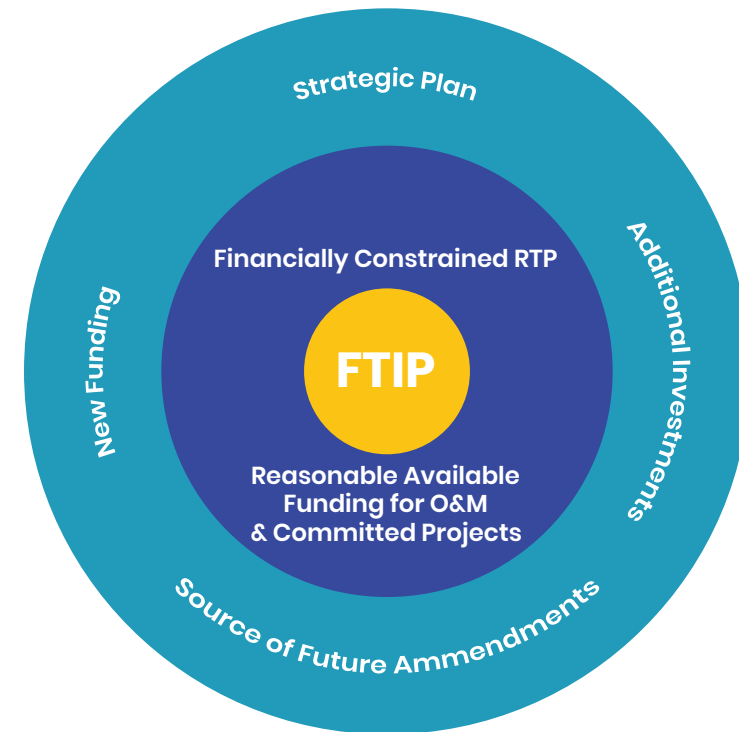

The project list is divided into three sections, consistent with the framework in **FIGURE 1**. At the center is the Federal Transportation Improvement Program (FTIP), which forms the foundation of the RTP project investment strategy and represents the first six years of already-committed funding for projects requiring federal approval or those that are regionally significant. This RTP incorporates the adopted 2019 FTIP. The RTP contains an additional financially constrained set of transportation projects above and beyond the FTIP. Finally, the Strategic Plan represents an unconstrained list of potential projects that the region would pursue given additional funding and commitment.

As part of the 2019 FTIP, projects from the 2018 State Transportation Improvement Program (STIP) and any subsequent STIP are reviewed for consistency with the RTP before inclusion into the adopted 2019 FTIP and upcoming 2021 FTIP. The STIP is comprised of the Interregional Transportation Program (ITIP) and Regional Transportation Improvement Program (RTIP).

Please note that within the project list, the completion year for non-modeled projects that are exempt from conformity may be inconsistent with upcoming 2019 FTIP amendments or the 2021 FTIP. Since these projects are exempt from conformity, changes in completion years are granted. The project list will be made consistent with the latest FTIP during the next RTP amendment or adoption.

For more information on transportation conformity and the interrelation between the plans and the programs, please refer to Chapter 5 of Connect SoCal and the Transportation Conformity Analysis Technical Report.
