Recognizing the transportation safety challenges confronting the region, in 2021, SCAG adopted a resolution affirming its regional leadership role and commitment to advancing transportation safety and adopted a Regional Safety Policy that:

- Endorses Toward Zero Deaths (TZD) as part of a comprehensive effort to strive to achieve zero transportation-related fatalities and serious injuries in the SCAG region by 2050.
- Motivates data-driven approaches, including High Injury Networks and safety modeling, to inform safety policy and planning and the strategic use of available funds and resources.
- Promotes equity in regional safety policies and plans by considering and analyzing impacts on Priority Equity Communities and protecting vulnerable roadway users such as pedestrians, bicyclists, older adults, and youth.
- Engages regional stakeholders in transportation safety policy and plan development, implementation, and evaluation, with the goal of achieving alignment with TZD.
- Provides leadership at the state and regional levels to promote transportation safety, including supporting statewide efforts such as the Strategic Highway Safety Plan and legislation that furthers TZD.

SCAG depends on data to make better transportation decisions that result in fewer fatalities and serious injuries and to find solutions to make the region safer for everyone. In support of this effort, SCAG completed an analysis of the region's existing transportation safety conditions and some of the key facts are presented on this factsheet.
