

Model and Forecast Data Request

This Model and Forecast Data Request Form is between the Requester and the Southern California Association of Governments (SCAG). The purpose of this request form is to provide a mechanism for SCAG's Modeling Department to log and maintain the data requests that are received for the specified areas.

Please fill in this form in its entirety and return the form to Cheryl Leising at leising@scag.ca.gov and Hao Cheng at chengh@scag.ca.gov. Pending approval, the request will then be given a timeframe for completion and forwarded to the appropriate staff member who will fulfill the data requested. Please note that in-house projects and tasks take priority; adjust time for your request accordingly.

Please allow a minimum of 45 days lead time for requests that need special processing or further discussion of the information that is requested. The timeframe may be shortened based upon in-house work and if the request contains "off-the-shelf" information that is readily available.

NOTE: For consultants or those working with cities and/or member agencies, please attach a written request on city letterhead. Please send the attachment with your request as a PDF file.
