Subject: RHNA Methodology

We badly need an update to the RHNA methodology as the current options are broken and do not serve the interests of our state or communities. I encourage the HUD to work with SCAG (Southern California Association of Governments) to devise a methodology that works for both the state's and our goals. The current systems do not take available jobs in account and would be a disaster for our cities in terms of traffic and pollution. Please partner with us instead of forcing arbitrary and one-size-fits-all policies on us.
