Hi...

I would like to urge more low income and affordable housing in Los Angeles County. The regentrification of Los Angeles County has displace a lot of low-income families out of their homes or raised their rents to extremes. Families are doubling up in apartments just to make ends meet. The rent for an apartment counts for most of ones pay a month. Resulting in homelessness. There is a rise in people living in their vehicles and in the street. Please consider making more affordable homes in and around the business area of Los Angeles this would our community and economy.

Respectfully,
