DESCRIPTION

Project includes the construction of roadway and traffic signal modifications at six existing traffic signal-controlled intersections in the City of Carson. These intersections experience significant travel delays and deficient levels of service when motorists divert from the I-110 freeway to avoid freeway congestion during peak hours. Completion of the intersection and signal improvements is anticipated to improve level of service and reduce delays at the project intersections. NO SIGNAL SYNC.

DESCRIPTION

The purpose of this project is to improve the merging area along MBB at Pacific Avenue, reduce congestion, improve safety and provide smoother traffic flow by potentially two options: Convert 1st WB through the lane to left-turn only lane (70 ft), and extend and elongate the merging area to the east (270 ft). Or reconfigure the intersection layout to create left-turn pockets for both EB and WB directions (70 ft), with the signal upgrade.
