1. INTRODUCTION

On April 4, 2024, the Southern California Association of Governments (SCAG) adopted the 2024-2050 Regional Transportation Plan/Sustainable Communities Strategy (referenced as Connect SoCal 2024 or RTP/SCS herein) for the six-county region including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. Connect SoCal 2024 reflects the region's commitment to improve mobility, communities, environment, and economy for all. To achieve these goals, the RTP/SCS demonstrates how the region will reduce greenhouse gas emissions from transportation sources to comply with California Senate Bill 375 (SB 375) and meet Federal Transportation Conformity Requirements pursuant to the federal Clean Air Act (42 U.S.C. Section 7401 et seq.).

A major component of Connect SoCal 2024 is a Project List containing thousands of individual transportation projects that aim to improve the region's safety, mobility, air quality, sustainability, and support our economy. Since Connect SoCal 2024's adoption, some of these projects have experienced time-sensitive technical changes that require that the RTP/SCS and the Federal Transportation Improvement Program (FTIP) be amended to allow these projects to move forward in a timely manner.

The Connect SoCal 2024 Amendment 1 (Amendment 1) serves as a concurrent amendment to the 2025 FTIP setting forth for changes to projects in the RTP/SCS and the FTIP that will be carried forward as part of the 2025 FTIP.

The purpose of this document is to identify the project changes made via Amendment 1 to the RTP/SCS and provide documentation demonstrating that Connect SoCal 2024, as amended, will continue to be consistent with federal and state requirements, including the Infrastructure Investment and Jobs Act, the Fixing America's Surface Transportation Act and Moving Ahead for Progress for the 21st Century Act planning requirements, the Transportation Conformity Rule, and SB 375. An environmental assessment is also being conducted and an addendum to the certified Program Environmental Impact Report (PEIR) for Connect SoCal 2024 (State Clearinghouse No. 2022100337) will be prepared to evaluate the potential environmental impacts associated with the changes to the Project List as detailed herein.

2. PROJECT MODIFICATIONS

The project changes in Amendment 1 can be broadly categorized as follows:

- The project is new and not currently included in the Connect SoCal 2024 Project List,
- The project currently exists in the Connect SoCal 2024 Project List, but has a:
 - Revised description,
 - Revised schedule, and/or
 - Change in total cost.

Amendment 1 incorporates changes to the RTP/SCS projects in addition to changes to state and local highway, transit, and passenger rail projects that will be carried forward as part of the 2025 FTIP.

The tables on the following pages provide details of the project changes from the current RTP/SCS and are intended to illustrate a before-and-after scenario for each of the projects. For a complete listing of projects please refer to the Connect SoCal 2024 Project List Technical Report, which can be accessed via the following link:

3. FISCAL IMPACT

Amendment 1 includes changes to existing projects, deletion of existing projects, and the addition of new projects. Individual project changes are addressed in the Project Modifications section of this document.

In terms of overall impact on the Connect SoCal 2024 Financial Plan, project modifications result in an overall net cost increase of \$150.3 million to the Connect SoCal 2024 Financial Plan, which is less than a half of a percent of total Connect SoCal 2024 expenditures. Cost increases resulting from new projects and changes to existing projects added as part of Amendment 1 are being funded by a variety of local sources.

Based on a review of the funding considerations for each project documented herein, SCAG finds that Amendment 1 does not adversely impact the financial constraint of the Plan. Connect SoCal 2024 remains financially constrained.

Table 4. Fiscal Impact Summary

(Amounts in \$1,000's)	Total
Cost Increases: Changes to Existing Projects and New Projects	\$1,143,074
Cost Decrease: Changes to Existing Projects and Deleted Projects	(\$992,737)
Net Cost Increase (Decrease)	\$150,337

4. SENATE BILL 375 AND THE SUSTAINABLE COMMUNITIES STRATEGY

Upon the adoption of Connect SoCal 2024, SCAG determined that the RTP/SCS met and/or exceeded all requirements for a Sustainable Communities Strategy (SCS) as set forth in SB 375. A description of how the SCS addresses requirements is included in Connect SoCal 2024 Chapters 3 and 5 and the Connect SoCal 2024 Land Use and Communities Technical Report and Supplementals sections. At the time of adoption, SCAG concluded that the State established per-capita greenhouse gas (GHG) emission reduction target of 19 percent by 2035 had been met and/or exceeded. The California Air Resources Board (ARB) is reviewing this conclusion.

This Amendment 1 to Connect SoCal 2024 incorporates certain changes to transportation projects and other assumptions as described in this document. Staff has reviewed the Amendment 1 relative to the adopted RTP/SCS and to the requirements of SB 375 and has determined that with the Amendment 1, Connect SoCal 2024 remains in compliance with SB 375 and continues to meet and/or exceed the GHG emission reduction targets.

5. PERFORMANCE MEASURES

In 2012, the Moving Ahead for Progress for the 21st Century Act (MAP-21) transportation authorization legislation established transportation system performance monitoring as a federal mandate. This commitment to a national performance management and reporting system was furthered with passage of the subsequent Fixing America’s Surface Transportation Act in 2015 and, more recently, the Infrastructure Investment and Jobs Act in 2021. SCAG has been actively developing and using performance metrics long

before MAP-21 became law, starting with the 1998 Regional Transportation Plan (RTP), which used quantitative performance measures to evaluate its capabilities to achieve its goals.

The Federal Highway Administration and the Federal Transit Administration require state departments of transportation (DOTs) to coordinate with metropolitan planning organizations (MPOs) to develop performance targets for transportation system safety, infrastructure preservation, and operational efficiency, among other measures. MPOs are now required to incorporate regional transportation and transit system performance measures and targets as part of their short and long-range transportation plans, including updates to the RTP and the FTIP. Since the adoption of Connect SoCal 2024 in April 2024, there have been no further updates.

6. TRANSPORTATION CONFORMITY ANALYSIS

Transportation conformity is required by provisions in the Federal Clean Air Act, to ensure federally supported highway and transit project activities conform to the air quality goals established by the State Implementation Plan (SIP). Conformity to the goals of the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant National Ambient Air Quality Standards (NAAQS). Conformity applies to nonattainment and maintenance areas in the SCAG region for the following transportation-related criteria pollutants: ozone, particulate matter (PM_{2.5} and PM₁₀), and carbon monoxide (CO).

Under the U.S. Department of Transportation metropolitan planning regulations and the U.S. Environmental Protection Agency's (EPA) transportation conformity regulations, Amendment 1 must pass five required tests: consistency with the adopted RTP/SCS, regional emissions analysis, timely implementation of transportation control measures (TCMs), financial constraint, and interagency consultation and public involvement.

The findings of the transportation conformity determination for Amendment 1 are presented below. Details of the regional emissions analysis follow the findings.

CONFORMITY FINDINGS

SCAG's findings for the approval of Amendment 1 are as follows:

- **Consistency with Connect SoCal 2024 Test**

Inclusion of the amended projects contained in Connect SoCal 2024 Amendment 1 would not change any policies, programs, strategies, or projects in the federally approved Connect SoCal 2024. The 2025 FTIP is consistent with Connect SoCal 2024 as amended (policies, programs, strategies, and projects).

Finding: Connect SoCal 2024 Amendment 1 is consistent with the federally approved Connect SoCal 2024 and meets all applicable federal and state requirements and regulations.

- **Regional Emissions Analysis Test**

Finding: The latest planning assumptions, transportation modeling, emissions modeling, and regional emissions analysis for Connect SoCal 2024 Amendment 1 are identical to those for the 2025 FTIP and updates the regional emissions analysis for Connect SoCal 2024.

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for ozone precursors (2008 and 2015 NAAQS) meets all applicable emission budget tests for all milestone, attainment, and planning horizon years in the Morongo Band of Mission Indians (Morongo), Pechanga Band of Luiseño Mission Indians of the Pechanga Reservation (Pechanga), SCAB excluding Morongo and Pechanga, South Central Coast Air Basin ([SCCAB], Ventura County portion), Western Mojave Desert Air Basin ([MDAB], Los Angeles County Antelope Valley portion and San Bernardino County western portion of MDAB), and the Salton Sea Air Basin ([SSAB], Riverside County Coachella Valley and Imperial County portions).

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for PM2.5 and its precursors (1997, 2006, and 2012 NAAQS) meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in the SCAB (Pechanga excluded under 2012 annual PM2.5 NAAQS).

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for CO meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in the SCAB.

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for PM10 and its precursors meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in the SCAB and the SSAB (Riverside County Coachella Valley and Imperial County portions).

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for PM10 meet the interim emission test (build/no-build test) for all milestone, attainment, and planning horizon years in the MDAB (San Bernardino County portion excluding Searles Valley portion) and Searles Valley portion of San Bernardino County.

Finding: Connect SoCal 2024 Amendment 1 regional emissions analysis for PM2.5 and its precursors (2006 and 2012 NAAQS) meet the interim emission test (build/no-build test) for all milestone, attainment, and planning horizon years in the SSAB (urbanized area of Imperial County portion).

- **Financial Constraint Test**

Finding: Connect SoCal 2024 Amendment 1 complies with federal financial constraint requirements under 23 U.S.C. Section 134(h) and 23 CFR Section 450.324(e). Connect SoCal 2024 Amendment 1 demonstrates financial constraint in the financial plan by identifying all transportation revenues including local, state, and federal sources available to meet the region's expenditure totals. Financial constraint is analyzed and demonstrated in the analysis contained in the Fiscal Impact Section of this report.

- **Timely Implementation of TCMs Test**

Finding: The TCM project categories listed in the 1994/1997/2003/2007/2012/2016/2022 Ozone SIPs for the SCAB area were given funding priority, are expected to be implemented on schedule, and, in the case of any delays, any obstacles to implementation have been or are being overcome.

Finding: The TCM strategies listed in the 2016/2022 Ozone SIPs for the SCCAB (Ventura County) were given funding priority, are expected to be implemented on schedule, and, in the case of any delays, any obstacles to implementation have been or are being overcome.

Timely implementation of TCMs is demonstrated and documented in the 2025 FTIP Technical Appendix, Volume II, Section V: Timely Implementation of Transportation Control Measures (TCMs).

- **Interagency Consultation and Public Involvement Test**

Finding: Connect SoCal 2024 Amendment 1 comply with all federal requirements for interagency consultation and public involvement. Amendment 1 is discussed at the monthly meetings of the Transportation Conformity Working Group (TCWG), which includes representatives from the federal, state, and local air quality and transportation agencies throughout the Amendment 1 development process. The transportation conformity analysis as part of Amendment 1 will be posted on SCAG's website (www.scag.ca.gov) for a 30-day public review and comment period on July 12, 2024. Public hearings will be held on July 23, 2024, and July 30, 2024. These public hearings will be publicly noticed in numerous newspapers throughout the region. The public notices are published in English, Spanish, Korean, Chinese, and Vietnamese languages. All comments received on Connect SoCal 2024 Amendment 1, including the associated transportation conformity analysis during the public review and comment period will be documented and responded to.

REGIONAL EMISSIONS ANALYSIS

The following tables summarize the required regional emissions analysis for each of the nonattainment and maintenance areas within SCAG's jurisdiction based on EMFAC2021, which is the emission model approved by U.S. EPA for use in the State Implementation Plan (SIP) development and transportation conformity in California, effective November 15, 2022. EMFAC2021 is the latest update to the EMFAC model for use by California state and local governments to meet federal CAA requirements. The new model (EMFAC2021), based on improved data and new and amended regulations in California, calculates emissions from on-road motor vehicles.

In addition, CARB's adjustment factors for EMFAC2021 had been applied to the regional emissions analysis tables in the Connect SoCal 2024 Amendment 1 document to account for the emission benefits of California's Heavy-Duty Vehicle Inspection and Maintenance Program (HD I/M Program) adopted by CARB after and thus not included in EMFAC2021. Under 40 CFR 93.122(a)(3)(i) of the Transportation Conformity Regulations, emission reductions from a regulation can be included in a transportation conformity regional emissions analysis if the regulation has been adopted by the enforcing jurisdiction. CARB approved the HD I/M Program regulation in December 2021, the California Office of Administrative Law approved it with an effective date of January 1, 2023, and the HD I/M Program began operation on that date. Therefore, CARB has adopted this Program, which is necessary before the emission reductions can be used in transportation conformity regional emissions analyses.

On May 26, 2023, EPA approved the CARB-developed interim off-model adjustment factors for EMFAC2021 for regional emissions analyses in transportation plan and TIP conformity determinations, not for CO or PM hot-spot analyses for project-level conformity determinations. The approved interim transportation conformity off-model adjustment factors will remain applicable until the first California nonattainment area 70 parts per billion 8-hour ozone attainment demonstration and/or reasonable further progress demonstration and associated motor vehicle emissions budgets are approved by EPA. The interim off-model adjustment factors account for only 50 percent of the emissions benefits of the previous EMFAC2021 adjustment factors. Impacting emissions of NOx, PM2.5, and PM10 but not CO nor

ROG, the interim off-model adjustment factors were applied and reflected in the following regional emission analysis tables.

For those areas which require budget tests, the emissions values in the tables below utilize the rounding convention used by CARB to set the budgets (i.e., any fraction rounded up to the nearest ton), and are the basis of the conformity findings for these areas. For paved road dust (PM2.5 and PM10), SCAG uses the approved South Coast AQMD methodology, which uses U.S. EPA’s AP-42 for the updated Base Year and a combination of additional growth in center-line miles and VMT for future years. The VMT by vehicle class values were estimated by linear interpolation before performing regional emissions modeling for two analysis years (2029 and 2030) because they are neither attainment years nor horizon years for the adopted Connect SoCal 2024, Amendment 1 to Connect SoCal 2024, and 2025 FTIP.

7. PUBLIC COMMENT AND REVIEW

SCAG is required to provide a 30-day public review and comment period for the draft Amendment 1. A Notice of Availability and Public Hearing and the draft Amendment 1 were posted on SCAG's website as of July 12, 2024. Written comments will be accepted from July 12, 2024, until 5:00 PM, August 12, 2024, via US mail or email to:

Southern California Association of Governments
Attention: Nancy Lo
900 Wilshire Blvd. Ste. 1700
Los Angeles, CA 90017
or lo@scag.ca.gov

SCAG will hold two public hearings on the draft Amendment 1 to the Connect SoCal 2024. The first public hearing will be on July 23, 2024, at 6:00 p.m. The second public hearing will be on July 30, 2024, at 10:00 a.m. Please refer to SCAG's website for further details. SCAG will offer in-person and virtual participation options for each public hearing.

The purpose of the hearing is to receive public input and comments that SCAG will use to facilitate changes to the draft documents where appropriate. Upon completion of the public review period, SCAG staff will log the comments received through this process, provide responses to all comments, and finalize the documents for potential adoption. SCAG encourages interested parties to submit written comments and/or written information prior to the public hearings.

SCAG has fully coordinated this draft Amendment 1 with regional stakeholders through SCAG's committee structure. Specifically, staff provided periodic reports regarding this Amendment 1 to the Transportation Committee and Transportation Conformity Working Group.

8. CONCLUSION

Amendment 1 maintains the integrity of the transportation conformity findings and meets all federal transportation conformity requirements. Amendment 1 also maintains compliance with SB 375 as the amended Connect SoCal 2024 will continue to meet and exceed the greenhouse gas emission targets. Appropriate and adequate procedures are followed in ensuring coordination of Amendment 1, allowing all concerned parties, stakeholders, and the public ample opportunities to voice concern and provide input. In conclusion, Amendment 1 to Connect SoCal 2024 complies with all applicable federal and state requirements, including transportation conformity and SB 375.
