ADJOURNMENT
DATE: February 24, 2014

TO: Bylaws and Resolutions Committee

FROM: Joann Africa, Chief Counsel; (213) 236-1928; africa@scag.ca.gov

SUBJECT: Proposed Bylaws Changes

RECOMMENDED ACTION:
That the Committee review the following proposed changes to the SCAG Bylaws; provide direction to staff; and forward its recommendations to the Regional Council.

EXECUTIVE SUMMARY:
Each year, in preparation for the annual General Assembly meeting, proposed resolutions and proposed amendments to the SCAG Bylaws are considered by both the Bylaws and Resolutions Committee (Committee) and the Regional Council, prior to submission to the General Assembly. SCAG staff received two proposed Bylaws amendments by Orange County Supervisor Shawn Nelson for consideration by this year’s General Assembly. In addition, staff is proposing changes to the Bylaws regarding ex-officio members on SCAG’s Policy Committees and minor changes regarding the composition of Bylaws & Resolutions Committee. The Committee is requested to review these proposed changes to the Bylaws; provide direction to staff; and formally provide its recommendations to the Regional Council on March 6, 2014.

STRATEGIC PLAN: This item supports SCAG’s Strategic Plan Goal 1 (Improve Regional Decision Making by Providing Leadership and Consensus Building on Key Plans and Policies; Objective C (Provide practical solutions for moving new ideas forward).

BACKGROUND:
Every year, proposed changes to the SCAG Bylaws may be presented by Official Representatives of SCAG, and these proposals are thereafter reviewed by the Committee and Regional Council before submittal to the General Assembly. In addition, staff may propose changes to the Bylaws to be considered to address matters that were raised during the course of the year. This year staff received two proposals from Orange County Supervisor Shawn Nelson which are discussed in the first part of this report. Staff is also proposing changes to the Bylaws which are discussed in the second part of this report.

A. Proposed changes by Supervisor Shawn Nelson

Supervisor Nelson submitted the following two concepts as changes to the Bylaws:

(1) If at any time a member of the Southern California Association of Governments receives a waiver for annual dues for a fiscal year, that member shall forfeit:
   • Voting on Agenda Items
   • Leadership position of Regional Council/Committees
   • Membership stipend for attendance
(2) All Action Items on the Regional Council and Committee Agendas shall be placed at the beginning of the Agenda, prior to hearing any presentations or informational/receive and file items.

With respect to the first proposal, Supervisor Nelson is concerned that representatives of member jurisdictions whose annual dues have been waived by the Regional Council currently have equal privileges as representatives of dues-paying members, such as the abilities to vote and receive a meeting stipend. He recommends that these privileges be forfeited in the event of a waiver of dues by the Regional Council. Staff has addressed this proposal in the attached marked-up copy of the SCAG Bylaws (see Art. VIII, Section C, page 20). Staff presented this proposed change to the Bylaws to the Presidents Council on February 20, 2014. While the Presidents Council questioned the need for such a change given that only two cities in the past have received a waiver of its dues by the Regional Council, it did acknowledge the importance of having the proposal reviewed by the Committee. Finally, staff from Supervisor Nelson’s office will be in attendance at today’s meeting to help address questions regarding this proposal.

With respect to the second proposal, matters relating to meeting procedures are addressed in the Regional Council Policy Manual, not in the SCAG Bylaws. As such, it is staff’s recommendation that this proposal be deferred and be addressed as part of the review of the Policy Manual, not the SCAG Bylaws. SCAG staff intends for a comprehensive review of the RC Policy Manual to begin in the next few weeks. In addition, both Supervisor Nelson’s staff and the Presidents Council were agreeable to this recommendation.

B. **SCAG staff–initiated changes**

Staff is proposing to provide additional clarification regarding the matter of ex-officio members on the Policy Committees. As you may recall, the Regional Council recently approved the request of a member of the business sector to serve as an ex-officio member of the Energy and Environment Committee. This request prompted a review of the matter, including the current provisions in the SCAG Bylaws. Specifically, the Presidents Council reviewed the matter in October 2013 and approved the proposed language drafted by SCAG staff that seeks to provide more clarification, such as the number of ex-officio members on the Policy Committees and their respective term of office (see Art. V, Section E (2) (c), page 14).

Staff also proposes a minor change to allow for additional membership on the Bylaws and Resolutions Committee (see Art. XI, page 23).

The Committee is asked to consider and discuss all of these proposed changes and provide direction to staff.

SUBJECT: Proposed Resolution for consideration by the General Assembly

EXECUTIVE DIRECTOR’S APPROVAL:

RECOMMENDED ACTION:
That the Committee review the following proposed resolution to be considered be adopted by the General Assembly; provide direction to staff; and forward its recommendation to the Regional Council.

EXECUTIVE SUMMARY:
Each year, in preparation for the annual General Assembly meeting, proposed resolutions and proposed amendments to the SCAG Bylaws are considered by both the Bylaws and Resolutions Committee (Committee) and the Regional Council, prior to submission to the General Assembly. SCAG staff received a request from SCAG Second Vice-President and Mayor of El Centro Cheryl Viegas-Walker for a proposed resolution supporting the “Salton Sea Restoration & Renewable Energy Initiative” (“Initiative”) for consideration by this year’s General Assembly. The Initiative was developed by the Imperial Irrigation District (“IID”) in partnership with Imperial County and seeks to address the growing water, air quality and environmental issues in the Salton Sea. Specifically, the Initiative focuses on a smaller, but sustainable Salton Sea, and seeks to leverage funds generated by new renewable energy projects located at the Sea to help finance activities for air quality management and habitat restoration.

The City of El Centro adopted a resolution supporting the Initiative earlier this year. The Committee is requested to review these proposed changes to the Bylaws; provide direction to staff; and formally provide its recommendation to the Regional Council on March 6, 2014.

STRATEGIC PLAN: This item supports SCAG’s Strategic Plan Goal 1 (Improve Regional Decision Making by Providing Leadership and Consensus Building on Key Plans and Policies; Objective C (Provide practical solutions for moving new ideas forward).

BACKGROUND:
The SCAG Bylaws provides the opportunity for any Official Representatives of SCAG to propose any policy matter for action by the General Assembly by way of submittal of a resolution. Mayor Viegas-Walker has proposed that the General Assembly approve a resolution supporting the Salton Sea Initiative, and a draft of the resolution is attached with this report. The Salton Sea is the largest inland lake in California, totaling more than 375 square miles in Imperial and Riverside counties. In recent years, it has developed increased salinity and other water quality problems that have made it inhospitable to wildlife, recreation and other human uses. After 2017, mitigation flows to the Salton Sea to offset the impact of water transfers will cease, causing the sea to shrink dramatically and causing further decline in water quality.

At the February 6, 2014 Regional Council meeting, a representative from the IID spoke about the growing problems surrounding the Salton Sea and how the Initiative seeks to address these problems. Focused on a smaller, but sustainable Salton Sea, the Initiative proposes the development of renewable energy projects and subsurface mining extraction opportunities to provide a funding mechanism to jump-start restoration.
and subsurface mining extraction opportunities to provide a funding mechanism to jump-start restoration. The IID representative also noted that implementing the Initiative will require the collaboration of numerous local, state and federal agencies as well as the private sector. At the meeting, some RC members inquired how jurisdictions could assist and it was noted that the City of El Centro had passed a resolution in support of the Initiative. Thereafter, Mayor Viegas-Walker submitted a request that the SCAG General Assembly consider adoption of a similar resolution. The attached draft General Assembly resolution is modeled after El Centro’s resolution as well as a sample resolution provided by IID.

The Committee is asked to review the proposed resolution, provide direction to staff and formally provide a recommendation to the Regional Council. Along with the draft resolution, also attached is information about the Initiative which was previously distributed by the IID representative at the February 6th RC meeting.

**ATTACHMENTS:**

1. Draft General Assembly resolution supporting Salton Sea Restoration & Renewable Energy Initiative
2. IID’s Information Sheet regarding Salton Sea Restoration & Renewable Energy Initiative
WHEREAS, the Salton Sea is an endangered environmental resource, serving as a key resting stop on the Pacific Flyway for over 400 avian species but facing imminent collapse due to reduced inflows and increasing salinity; and

WHEREAS, in 2002, the State of California committed through the Salton Sea Restoration Fund Act to being solely responsible for the funding and implementation of a Salton Sea restoration plan to facilitate Imperial Irrigation District’s (IID) authorization of the 2003 Quantification Settlement Agreement (QSA), a series of agreements which enabled California to live within its 4.4 million-acre foot annual Colorado River entitlement; and

WHEREAS, in 2007, the State completed an environmental process identifying Salton Sea restoration alternatives, including an $8.9 billion preferred alternative that was never acted upon by the Legislature and that has received little to no attention since that time; and

WHEREAS, the continued viability of the 2003 QSA, which authorized the nation's largest agricultural-to-urban water transfer, is influenced by certain commitments the state of California assumed for itself beyond the environmental mitigation funding responsibilities of the participating water agencies; and

WHEREAS, in 2018, the IID water transfer programs at the core of the 2003 QSA will fully transition from fallowing to efficiency-based conservation measures and the mitigation deliveries meant to offset conservation impacts for the first 15 years of the QSA will have ended, resulting in significantly reduced inflows to the Salton Sea and the beginning of dramatic declines in water surface elevation, increased salinity levels and accelerated playa exposure; and

WHEREAS, implementation of Salton Sea restoration will offset the need for many expensive QSA air quality and habitat mitigation requirements; and

WHEREAS, IID and Imperial County entered into a Memorandum of Understanding (MOU) on October 24, 2013, aimed at finding a collaborative Salton Sea restoration solution designed to minimize the looming environmental and air quality impacts from the QSA water transfers projected to occur after 2017;

WHEREAS, the MOU is the foundation of the Salton Sea Restoration & Renewable Energy Initiative, which is focused on a smaller, but sustainable Salton Sea. Designed around reduced inflows, and taking advantage of the playa in the Known Geothermal Resource Area at the Salton Sea that will be exposed as the shoreline recedes, the initiative proposes the development of renewable energy projects and subsurface mining extraction opportunities to provide a $3 billion funding mechanism to jump-start restoration; and
WHEREAS, these renewables can serve to provide up to 1,700 megawatts of geothermal baseload energy and countless other renewable generation opportunities such as solar, wind, solar gradient and other developing green technologies to assist load-serving utilities in meeting California’s renewable portfolio standard requirements.

NOW, THEREFORE, THE GENERAL ASSEMBLY OF THE SOUTHERN CALIFORNIA ASSOCIATION OF GOVERNMENTS DOES HEREBY RESOLVE AS FOLLOWS:

1. That the General Assembly of the Southern California Association of Governments (“SCAG General Assembly”) offers its support for the Salton Sea Restoration & Renewable Energy Initiative concept and encourages the State of California to fulfill both its Salton Sea mitigation and restoration responsibilities in order to ensure the continued but transformed status of the Salton Sea as an environmental resource, protect the health and air-quality of both the Imperial and Coachella Valleys’ citizenry, ensure that the vital and large-scale agricultural operations of this area of Southern California remain productive and continue to provide critical food supplies to feed our nation and increase renewable energy production while serving as an economic stimulus to these same disadvantaged communities.

2. That the SCAG General Assembly authorizes and directs the Executive Director to submit a copy of this Resolution to the appropriate representatives associated with the Salton Sea Restoration & Renewable Energy Initiative.

PASSED, APPROVED AND ADOPTED at the Annual Meeting of the General Assembly of the Southern California Association of Governments held on the 1st day of May, 2014.

The Salton Sea is the largest inland lake in California, totaling more than 375 square miles in Imperial and Riverside counties. The Sea supports a diverse wildlife habitat for over 400 species of birds and serves as a critical link on the 5,000-mile international Pacific Flyway for bird migration.

CRISIS AT THE SALTON SEA

Today, the Salton Sea faces a crisis. In recent years, it has developed increasing salinity and other water quality problems that have made it inhospitable to wildlife, recreation and other human uses. The sea elevation has also been receding due to reduced inflows resulting from changing hydrological conditions on the Colorado River system.

After 2017, mitigation flows to the Salton Sea to offset the impact of water transfers will cease, causing the sea to shrink dramatically and hastening its decline in water quality. In addition, a receding sea will expose more than 50,000 acres of lakebed made up of silt and fine-grain soil particles that contain farm-field sediments. This exposure poses an urgent threat to air quality for residents in the Imperial and Coachella valleys, as desert winds moving across the “playa” will cause fine dust and toxins to become airborne.

Together, these water and air quality issues present imminent public health and environmental risks that must be addressed.

A BOLD NEW VISION FOR ACTION

After a decade during which commitments made by the State of California to restore the Salton Sea have not been fulfilled, a new vision has emerged: a smaller but sustainable Salton Sea that enables restoration through harnessing its vast renewable energy potential.

The Salton Sea Restoration & Renewable Energy Initiative, launched by the Imperial Irrigation District in partnership with Imperial County, will leverage funds generated by new
renewable energy projects located at the sea to help finance activities for air quality management and habitat restoration. Projects sited on exposed lakebed will serve a dual purpose: producing renewable energy while doubling as groundcover to mitigate air emissions. Under legislation enacted in 2013, planning and implementing projects at the sea will be driven locally by the Salton Sea Authority, with support from the State of California.

The Initiative will first focus on developing up to 1,700 megawatts of new geothermal energy at the Sea – enough to power more than one million homes. Not only is there more geothermal generating capacity in the Imperial Valley than anywhere else in the U.S., but geothermal energy can be produced with minimal impact on landscape and habitat. It also provides a steady, reliable source of energy to the state electricity grid that is not subject to weather or seasonal fluctuations.

Core components of the Salton Sea Restoration & Renewable Energy Initiative include:

- Designating the Salton Sea as a renewable energy development area

- Pledging IID’s land holdings and mineral assets, as well as potentially those of the federal government, for generation projects such as utility-scale geothermal, solar and wind, subsurface mining operations and emerging resources (algae and solar gradient ponds)

- Pursuing public-private partnerships and environmental alliances to develop new renewable energy resources

- Continuing to work with state and federal regulatory agencies and investor-owned utilities to execute power purchase agreements and plan for the development of new transmission lines, such as a new 500 kilovolt line from eastern Riverside County to IID’s Imperial Valley substation

COLLABORATING FOR SOLUTIONS

Implementing the Initiative will require actions from numerous local, state and federal government agencies, as well as private companies that can invest their capital and experience in developing renewable energy projects. The Initiative will also require engagement by community stakeholders committed to restoring the Salton Sea to protect local communities and wildlife species from the consequences of its unchecked demise.

Working together, the Initiative can help assure the future of the Salton Sea, protect public health, conserve vital species habitat and create stability for meeting California’s water supply and energy needs.
