<i>Total Households</i>	<i>979</i>	<i>340</i>	<i>380</i>

Housing cost burden is most commonly measured as the percentage of gross income spent on housing, with 30% a usual threshold for 'cost burden' and 50% the threshold for 'severe cost burden.' However, a lower-income household spending the same percent of income on housing as a higher-income household will likely experience more true 'cost burden.' These data indicate the number of households in Holtville by their income relative to the surrounding area and their share of income spent on housing.

## Spending on Rent

### Spending on Rent by Income

American Community Survey 2014-2018 5-year estimates.

While the previous table breaks down cost burden by area-relative income, the ACS also allows for the analysis of Holtville's 562 renter households (for which income data are available) by spending on rent by income bracket (dollar amounts). As one might expect, the general trend is that low-income households spend a higher share of income on housing (e.g. over 50%) while high-income households are more likely to spend under 20% of income on housing.

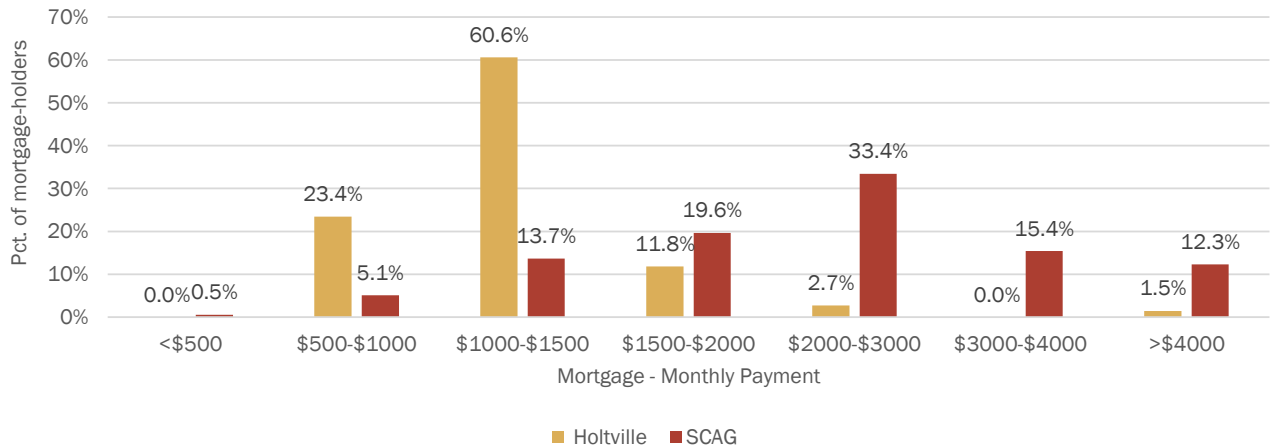

### Household Income by (Cash) Rent

American Community Survey 2014-2018 5-year estimates.

### Costs for Mortgage Holders by Income

Mortgage-holding households in Holtville can be broken down by income and the percentage of income spent on mortgage costs. The income category most prevalent amongst Holtville mortgage-holding households is \$50,000 to \$74,999 (233 households) and the most prevalent share of income spent on mortgage costs is 20-29% (205 households).
