VIII. FINAL REGIONAL HOUSING NEEDS ALLOCATION
Pre-Certified Local Housing Data for Needles

Developed by SCAG and pre-certified by the California Department of Housing and Community Development (HCD) for use in 6th cycle housing elements.

This report contains a wide range of jurisdiction-level data elements intended to provide an understanding housing need experienced in Needles as a part of its 6th cycle housing element update. Data sources are noted below each table or figure.

I. POPULATION, EMPLOYMENT, AND HOUSEHOLDS

Population Trend, 2000-2020

Needles has a 2020 total population of 5,248 including 5 living in group quarters according to the California Department of Finance. The chart above describes the population trend in Needles from 2000 to 2020. Over this period Needles had an annual growth rate of 0.4% compared to 0.7% for the region.
The population of Needles is 47.5% male and 52.5% female. The share of the population of Needles which is under 18 years of age is 25%, which is higher than the regional share of 23.4%. Needles's seniors (65 and above) make up 18.7% of the population, which is higher than the regional share of 13%.

Needles has 1,643 workers living within its borders who work across 13 major industrial sectors. The chart above provides detailed employment information. The most prevalent industry is Arts, Entertainment, Recreation with 314 employees (19.1% of total) and the second most prevalent industry is Retail trade with 247 employees (15% of total).
Employment by Occupation

![Employment by Occupation Chart]

American Community Survey 2014-2018 5-year estimates using groupings of SOC codes.

In addition to understanding the industries in which the residents of Needles work, it is also possible to analyze the types of jobs they hold. The most prevalent occupational category in Needles is Services, in which 544 (33.1% of total) employees work. The second-most prevalent type of work is in Sales, which employs 361 (22% of total) in Needles.

American Community Survey 2014-2018 5-year estimates using groupings of NAICS and SOC codes.

Statewide, farmworker housing is of unique concern and of unique importance. While only a small share of SCAG region jurisdictions have farmworkers living in them, they are essential to the region’s economy and food supply.
Housing security can depend heavily on housing tenure, i.e. whether homes are owned or rented. Needles's housing stock consists of 2,050 total units, 1,080 of which are owner-occupied and 970 of which are renter-occupied. The share of renters in Needles is lower than in the SCAG region overall.

In many places, housing tenure varies substantially based on the age of the householder. In Needles, the age group where renters outnumber owners the most is 25-34 (by 50.8%). The age group where owners outnumber renters the most is 75-84 (by 69%).
Across the SCAG region, the most common move-in period was 2010-2014 (31.9%) followed by 2000-2009 (26.1%). In Needles, the period during which most people started living in their current residence was 2010-2014 (34.8%) followed by 2015 or later (19.6%).

II. SPECIALIZED HOUSEHOLD NEEDS: LARGE FAMILIES, SENIORS, AND FEMALE-HEADED

Households by Household Size

This chart illustrates the range of household sizes in Needles for owners, renters, and overall. The most commonly occurring household size is of one person (37.3%) and the second-most commonly occurring household is of two people (27.3%). Needles has a higher share of single-person households than the SCAG region overall (37.3% vs. 23.4%) and a lower share of 7+ person households than the SCAG region overall (0.9% vs. 3.1%).

American Community Survey 2014-2018 5-year estimates.

Prepared by SCAG, Updated April 2021
12.7 percent of Needles's households are experiencing poverty, compared to 7.9 percent of households in the SCAG region. Poverty thresholds, as defined by the ACS, vary by household type. More information can be found at M256. In 2018, a single individual under 65 was considered in poverty with a money income below $13,064/year while the threshold for a family consisting of 2 adults and 2 children was $25,465/year.

Statute requires analysis of specialized housing needs, including female-headed households in an effort to ensure adequate childcare or job training services. Of Needles's 2,050 total households, 14.3% are female-headed (compared to 14.3% in the SCAG region), 10.3% are female-headed and with children (compared to 6.6% in the SCAG region), and 1.5% are female-headed and with children under 6 (compared to 1.0% in the SCAG region).

</tbody>
</table>

*HUD CHAS, 2012-2016. HAMFI refers to Housing Urban Development Area Median Family Income.*

Statute requires analysis of specialized housing needs, including housing needs for seniors. Federal housing data define a household type as 'elderly family' if it consists of two persons with either or both age 62 or over. Of Needles's 724 such households, 25.6% earn less than 30% of the surrounding area income, (compared to 24.2% in the SCAG region), 47% earn less than 50% of the surrounding area income (compared to 30.9% in the SCAG region).

**III. PEOPLE EXPERIENCING HOMELESSNESS**

![Graph showing sheltered, unsheltered, and total homelessness in Needles, 2019]

29 29

**Sheltered**  **Unsheltered**  **Total**

Needles

2019 city and county homelessness point-in-time counts processed by SCAG. Jurisdiction-level counts were not available in Imperial County and sheltered population (and thus total) counts were not available in Riverside County. As a result, SCAG region totals from this compilation of data sources likely undercount true totals.

#N/A
IV. PEOPLE WITH DISABILITIES, INCLUDING DEVELOPMENTAL DISABILITIES

**Disability by Type**

- Independent Living: 519
- Self-care: 231
- Ambulatory: 732
- Cognitive: 426
- Vision: 251
- Hearing: 241

American Community Survey 2014-2018 5-year estimates.

Disability data also provides valuable context for assessing current and future need for accessible housing units. Note that since some disability types are not recorded for children below a certain age, calculating disability as a percentage of total population may not be accurate.

**Disability by Type - Seniors (65 and over)**

- Hearing: 13.5% Needles, 13.1% SCAG Region
- Vision: 7.5% Needles, 6.6% SCAG Region
- Cognitive: 10.1% Needles, 10.5% SCAG Region
- Ambulatory: 23.1% Needles, 2.9% SCAG Region
- Self-care: 8.5% Needles, 10.5% SCAG Region
- Independent Living: 17.5% Needles, 7.5% SCAG Region

American Community Survey 2014-2018 5-year estimates.

In Needles, the most commonly occurring disability amongst seniors 65 and older was an ambulatory disability, experienced by 23.1% of Needles’s seniors (and 22.9% of seniors in the SCAG region).
Disability by Employment Status

CA DDS consumer count by CA ZIP, age group and residence type for the end of June 2019. Data available in 161/197 SCAG jurisdictions.

The California Department of Developmental Services also provides data on developmental disabilities by age and type of residence. These data are collected at the ZIP-code level and were joined to the jurisdiction-level by SCAG. Totals may not match as counts below 11 individuals are unavailable and some entries were not matched to a ZIP code necessitating approximation.
V. HOUSING STOCK CHARACTERISTICS

Housing Type

The chart above provides detailed information on the housing stock in Needles, which has a total of 2,873 housing units. The most prevalent housing type in Needles is single-family detached with 1,939 units. The share of all single-family units in Needles is 69.6%, which is higher than the 61.7% share in the SCAG region. Out of the total housing units in Needles, there are 2,048 occupied-units, which equates to a 28.7% total vacancy rate. The average household size (as expressed by the population to housing unit ratio) is 2.56.

CA DOF E-5 Population and Housing Unit Estimates

Over the past two decades (2000-2020), there has been more construction of single-family residential units than multi-family residential units in Needles. When comparing 2000 to 2020, SFR units increased by 523, MFR units increased by -59, and mobile homes decreased by -142.

CA DOF E-5 Population and Housing Unit Estimates

Prepared by SCAG, Updated April 2021
Examining the age of the current housing stock is one way to understand how historical development patterns have contributed to a city's form. The time period where the highest share of Needles's housing units were built is 1970-1979, while in the SCAG region more units were built during 1970-1979 than any other period.
Substandard Housing

The ACS includes surveys about three factors of what may be considered substandard housing. In Needles, 125 units lack telephone service, 17 units lack plumbing facilities, and 67 units lack complete kitchen facilities.

Median Home Sales Price for Existing Homes

Between 2000 and 2018, median home sales prices in Needles increased 35% while prices in the SCAG region increased 151%. 2018 median home sales prices in Needles were $89,000 and the highest experienced since 2000 was $128,000 in 2007. Prices in Needles have ranged from a low of 11.5% of the SCAG region median in 2012 and a high of 29.6% in 2000.
VI. OVERPAYMENT AND OVERCROWDING

Crowding by Extent and Tenure

In Needles, 49 owner-occupied and 18 renter-occupied households had more than 1.0 occupants per room, which meets the ACS definition for overcrowding. 27 owner-occupied households and 11 renter-occupied households had more than 1.5 occupants per room, which meets the ACS definition for severe overcrowding.

Core Logic/Data Quick. Additional detail available in SCAG 2019 Local Profiles. SCAG median home sales price calculated as household-weighted average of county medians.
Cost Burden by Income

<table>
<thead>
<tr>
<th>Income</th>
<th>&lt; 30%</th>

<td>294</td>
</tr>
</tbody>
</table>

Housing cost burden is most commonly measured as the percentage of gross income spent on housing, with 30% a usual threshold for ‘cost burden’ and 50% the threshold for ‘severe cost burden.’ However, a lower-income household spending the same percent of income on housing as a higher-income household will likely experience more true ‘cost burden.’ These data indicate the number of households in Needles by their income relative to the surrounding area and their share of income spent on housing.

Spending on Rent

Across Needles’s 970 renter households, 510 (52.6%) spend thirty percent or more of gross income on housing cost, compared to 55.3% in the SCAG region. Additionally, 170 renter households in Needles (17.5%) spend fifty percent or more of gross income on housing cost, compared to 28.9% in the SCAG region.
While the previous table breaks down cost burden by area-relative income, the ACS also allows for the analysis of Needles's 845 renter households (for which income data are available) by spending on rent by income bracket (dollar amounts). As one might expect, the general trend is that low-income households spend a higher share of income on housing (e.g. over 50%) while high-income households are more likely to spend under 20% of income on housing.

Needles renter households' cash rent paid can be broken down by household incomes. As one might expect, the general trend is that lower-income households spend less on rent while higher-income households spend more on rent, though this may not be universally true. Rent categories range from <$500/month (27.1% of Needles renters) to >$2000/month (0% of Needles renters). The most common rent category in Needles is $500-1000/month with 53.8% of renters.
Monthly Owner Costs for Mortgage Holders

American Community Survey 2014-2018 5-year estimates.

While renter households receive much of the focus when it comes to housing cost analysis, owner households make up 52.7% of Needles and 52.5% of the SCAG region. The most commonly occurring mortgage payment in Needles is $500-$1000/month and the most commonly occurring mortgage payment in the SCAG region is $2000-$3000/mo.

Costs for Mortgage Holders by Income

Mortgage-holding households in Needles can be broken down by income and the percentage of income spent on mortgage costs. As one might expect, the general trend is that lower-income households spend a higher share of income on housing costs, while high-income households may spend a lower share of income on housing. The income category most prevalent amongst Needles mortgage-holding households is $75,000 or more (227 households) and the most prevalent share of income spent on mortgage costs is under 20% (196 households).
Household Income by Home Value (for owned units)

<table>

Another approach to evaluating the relationship between housing and income is to compare incomes and home values in Needles. The most commonly-occurring income category amongst owner households in Needles is Less than $20,000 (270 households) and the most commonly-occurring home value category is Below $100,000 (630 households).

Extremely Low Income Housing Needs

Housing the extremely-low income population (below 30% of area median income) can be especially challenging. HUD’s CHAS dataset provides a wealth of information on such households in Needles. The above table provides a breakdown of extremely low income households by race and ethnicity. The race/ethnicity with the highest share of extremely-low income households in Needles is Black, non-Hispanic (59.2% compared to 28.2% of total population). In the SCAG region, the highest share of extremely-low income households is Black, non-Hispanic (27.1% compared to 17.7% of total households).

California Housing Partnership, July 2020. Includes HUD, Low-Income Housing Tax Credit (LIHTC), USDA, and CalHFA projects. Subsidized or assisted developments that do not have one of the aforementioned financing sources may not be included.

The California Housing Partnership (CHP) provides data on assisted housing units and assesses the level of risk to converting to market rate. These data identify homes without a known overlapping subsidy that would extend affordability beyond the indicated timeframe and unless otherwise noted are not owned by a large/stable non-profit, mission-driven developer. Detailed 2019 data can be found in SCAG’s RHNA data appendix at http://scag.ca.gov/programs/Documents/RHNA/SCAG-Final-RHNA-Data-Appendix-030520.pdf. Complete, updated data can be requested from CHP through Danielle Mazzella, Preservation & Data Manager (dmazzella@chpc.net)

SCAG, 2021. Based on SCAG’s 6th cycle Final RHNA Allocation, adopted March 2021. Please note that for the housing element update, local jurisdictions will have to consider extremely low income (ELI) households as well. ELI housing needs may be calculated either by using Census data or simply assuming that 50 percent of the very low income households qualify as extremely low income households.
