

Natural and Lands Conservation Working Group

The purpose of the Natural Lands meetings is to gather a breadth of additional stakeholder input into the development and ongoing success of SCAG's conservation planning efforts. Meeting since 2014, the Natural Lands working group is comprised of a diverse group of stakeholders representing federal and state conservation agencies, nonprofits such as land trusts, academic institutions, as well as CTCs, Counties and Cities. The working group was instrumental in refining the conservation strategies and policies in the 2016 RTP/SCS Natural Lands Appendix, and will continue to be engaged for the 2020 RTP/SCS.
