To comply with federal legislation (Moving Ahead for Progress in the 21st Century Act, 2012; Fixing America's Surface Transportation Act, 2015), the California Department of Transportation (Caltrans) and SCAG are required to assess fatalities and serious injuries on all public roads and to set annual performance targets based on five-year rolling averages for the:

- Number of Fatalities;
- Rate of Fatalities per 100 million Vehicle Miles Traveled (VMT);
- Number of Serious Injuries;
- Rate of Serious Injuries per 100 million VMT; and
- Number of Non-motorized Fatalities and Non-motorized Serious Injuries.

In August 2017, Caltrans established its calendar year 2018 statewide targets. SCAG is required to establish its targets 180 days after the state, by February 27, 2018. SCAG has the option to agree to support Caltrans' targets, establish numerical targets specific to our region, or use a combination of both. SCAG is currently working with stakeholders on developing the regional targets.

As a part of the safety target setting effort, SCAG completed an analysis of the region's existing conditions and some of the key facts are highlighted here.
