Cost Burden by Income

Households by Share of Income Spent on Housing Cost:			
Income	< 30%	30-50%	> 50%
< 30% HAMFI	25	55	485
30-50% HAMFI	85	430	184
50-80% HAMFI	344	205	63
80-100% HAMFI	183	78	15

Total Households	2,217	1,068	766

Housing cost burden is most commonly measured as the percentage of gross income spent on housing, with 30% a usual threshold for 'cost burden' and 50% the threshold for 'severe cost burden.' However, a lower-income household spending the same percent of income on housing as a higher-income household will likely experience more true 'cost burden.' Spending on Rent by Income

American Community Survey 2014-2018 5-year estimates.

While the previous table breaks down cost burden by area-relative income, the ACS also allows for the analysis of Signal Hill's 2,411 renter households (for which income data are available) by spending on rent by income bracket (dollar amounts). As one might expect, the general trend is that low-income households spend a higher share of income on housing (e.g. over 50%) while high-income households are more likely to spend under 20% of income on housing.

Costs for Mortgage Holders by Income

Mortgage-holding households in Signal Hill can be broken down by income and the percentage of income spent on mortgage costs. The income category most prevalent amongst Signal Hill mortgage-holding households is \$75,000 or more (1,152 households) and the most prevalent share of income spent on mortgage costs is over 30% (670 households).
