Subject: Affordable Housing ????????????

Hi,

What are the talks for affordable housing right now in the Black space? I love art and I'm an artist myself but when do we get to the nitty gritty of housing for Black residents on the Westside that are still being displaced and monitored by the liberals who don't have our best interest, if they did the crisis wouldn't be what it is today. 60,000 or more are unhoused in Los Angeles.

Phil Brock says he's willing to discuss land space for tiny and small homes, I emailed him weeks ago and I haven't heard back. I don't need his help finding money to build the homes, I need the land space. I know about restorative justice for affordable apartments but when does the discussion start for housing that we actually own happen???

I've worked in Santa Monica for years, I worked mostly at a tech startup that I won't name and in that time I haven't been able to find affordable housing in the city. How much longer should myself and others wait for housing that was needed years ago????

I've cited on this article how Santa Monica's refusal to build affordable housing has displaced many residents!

Best,

Tieira

Another one Fam!

Please see the attached flyer and link to tomorrow's, 'Breathing Free' virtual event at 7 pm. Tomorrow's event will feature 'local policymakers and educators discuss[ing] their work toward restorative justice.' One of the policy makers speaking will be Kristin McCowan from the Santa Monica City Council.

Click the link for tickets and more info!
